

# Ryan Rozema

Full Stack Web Developer

Dana Point, CA  
(949) 636 - 9795  
rrozema2@gmail.com

## EXPERIENCE

### CISOSHARE, San Clemente — *Lead Software Engineer*

September 2019 - PRESENT

- Primary developer for our client facing application, admin portal, and API
- Manage growing team of developers
- Refactor the code bases for all CISOSHARE applications
- Implement CI/CD pipelines using GitHub Actions
- Create a more secure and scalable AWS environment for CISOSHARE applications
- Present demos to current and potential clients
- Gather requirements, create tickets, and distribute tasks to team

### CISOSHARE, San Clemente — *Full Stack Web Developer*

May 2017 - August 2019

- Utilized modern front-end technologies an admin portal and client application
- Built REST endpoints and microservices to efficiently store and process data
- Contributed to the quality assurance of all applications at CISOSHARE
- Create entity relationship diagrams with Visio for large relational databases

### C3 Business Solutions, Santa Ana — *Database Developer Intern*

Summer 2015 & Summer 2016

- Utilized SQL, PL/SQL, and Oracle Application Express
- Contributed to the development of the C3 Business Solutions mobile application
- Responsible for creating new reports using SQL on custom applications for clients
- Modified SQL queries and reports to increase efficiency, productivity and usability

## PROJECTS

### [ProgressLink](#) (CISOSAHRE) — *React, Redux, Express, RethinkDB*

An application that provides a combination of tools for organizations to use on their own to provide additional security program visibility.

### [SimpleDocs](#) — *TypeScript, React, Apollo, GraphQL, MongoDB*

Simple way to view documentation and make API calls to see their responses.

### [SalaryClassifier](#) — *Python*

A machine learning script that uses KNN, Naive Bayes, Decision Trees, and Random Forests classification algorithms to predict a person's salary.
